

we produce, industrialize
and export peanuts

Hello, we are **Morel Vulliez SA**, a company that has been working hand in hand with the agricultural producers of the south of Córdoba for almost 30 years.

Our team of more than 120 contributors focuses daily on getting our customers to reach the maximum potential of the field throughout all the seasons and in getting their grains to yield the best results possible.

We work alongside the agricultural producers giving them swift, innovative solutions and solving technical, financial, and technological problematics so that our customers can maximize their profitability.

Our productive division works in more than **25,000 hectares**, and several years ago, we ventured into the peanut production and its by-products, thus positioning ourselves as models and exporters. We have 7 subsidiaries that are strategically distributed to be near you, to know you. We have extensive knowledge about the field and its needs, and that is why we have one solution for every need, and we are there, near you when we are needed the most.

**PROVIDING SAFETY AS WE
MOVE FORWARD TOGETHER.**

**PEANUT
EXPERTS**

»» **We produce peanut** in association with a large amount of producers accompanying them professional and technically with our team of more than 10 agronomical engineers specialized in farming. All the produced hectares are administered according to the Comprehensive Traceability System that maintains the complete record at every stage producing high quality High-oleic Peanut.

»» **We collect peanut** in our collection center guaranteeing the quality and durability of the product. We do this through the use of processes that are certified by international BRC norms assuring the traceability of the product from the seed until the final consumer.

»» **We industrialize**, select and process peanut obtaining peanut that's ready for consumption, blanched peanut, and roasted peanut with national and international destination.

All Morel Vulliez products are subjected to exhaustive tests and are guaranteed by the application of food safety norms such as **BRC, HACCP system, Good Agronomic Practices (GAP), and Good Manufacturing Practices (GMP)** as well as the **ISO 9001 rules**. These controls allow us to answer to the demands, tendencies, and preferences of the international consumer.

»» **We export peanut consolidating American, South-American, European, Asian, and Middle East markets** and sending our products to countries such as the **United States of America, Canada, Germany, Holland, Spain, South Africa, Korea,** among others. We adapt our products according to the needs of each market, and that flexibility is what allows us to adjust to the needs of a global market.
